

## Disclaimer

Our products have been developed and manufactured according to the state of art acknowledged among experts. All product specific technical parameters, specification, characteristics of any kind or relating to the eligibility for an application presumed by us, hereinafter in general referred to as „the information“, published or mentioned in particular but not limited on our website, in brochures, data sheets or any other publication shall only be deemed information based on our experiences and analysis. Independent from the kind and from the scope of the presentation and irrespective of any change performed by us the information is determined exclusively for the description of the product in principle. Sensirion AG does not assume neither expressly nor implied any responsibility or obligation in particular but not limited to consultancy, warranty or liability unless exclusively agreed upon in written form.

The information therefore shall under no circumstances be deemed legally binding statements attributable to us including but not limited to specific characteristics, specifications, or guarantees of any kind or nature. The information is not determined for any of those purposes. The information shall not be used neither for such purpose nor for third parties or by third parties without our approval in writing. Any selection or application of the sensors need the responsible testing and checks of the user in regards to the eligibility, admissibility, conformity with statutory and governmental regulations including but not limited to harmonized norms and the compatibility with technical or any other environmental conditions relevant for the application. Sensirion AG reserves the right for any technical changes or changes for a specific application without any previous announcement.
